

Work Sheet 15

Name _____ Due Date _____

Memory Game

Materials: between 10 and 20 small items and a pillowcase

Ask your homework helper to put between 10 and 20 small items on a tray and cover them with something like a pillowcase. The other players in the game get 4 minutes to look at all the objects, name them and try to remember as many as they can. The helper covers them over again and the players write down as many objects as they can remember.

Take it in turns to be the helper.

Number Problems

Use the same objects from Memory Game. Write three or four problems about your objects and choose one to ask the class. Write the answers to the problems on your page but do not read it to us.

Here is an example:

There were 4 knives and 5 forks in our collection. Mum took a knife to butter her toast and Dad took a fork to eat some rice. How many knives and forks were left on the tray?

Answer: 3 knives & 4 forks

Remember to pack away all the objects at the end of the game.
